Job Posting: Fire Alarm/Systems Technician

Local design/build engineering & low voltage systems firm is looking for a Low Voltage systems technician with significant Fire Alarm experience. This is a full-time position with health insurance and other benefits. See www.lovosystems.com for general company information.

Fire alarm experience is required, and NICET certification or KY fire alarm inspectors license is highly desirable. Electrical experience is required. Candidate must demonstrate knowledge of industrial electrical control circuits including relays, switches, etc. and the ability to interpret electrical diagrams. Voice/data/fiber experience is preferred. BICSI certifications are highly desirable.

Candidate should have post-secondary education (tech school, community college, etc.) Responsibilities will include installation, servicing, and troubleshooting of access controls, security systems, analog & IP video surveillance systems, fire alarm systems, control panels, and voice-data-fiber systems for commercial and industrial customers. The ability and desire to constantly learn new technology is required. The technician will be required to work on many types of projects that require attention to detail and a multitude of skills.

Clean background check, drug test, and valid driver's license with clean motor vehicle record will be required. Candidate must have professional appearance and good English communication skills, and must reside in the Lexington or Central KY area.

Submit a resume with education history, experience history, minimum of three references, and salary history to info@lovosystems.com
